## - Edge 46 J Reverse

## Range w.t. 8-120 mm (5/16" - 4 3/4")

EDGE 46 Reverse designed for beveling the lower side of the plate. Heavy duty machine, powerful and strong, suggested for particularly demanding applications on plates with a high grade of hardness and wall thickness.

RANGE: 5/16" -4 3/4" thickness
FUNCTIONS: bevel from $15^{\circ}$ to $60^{\circ}$
MATERIALS: carbon steel, stainless steel, duplex, super duplex, inconel, aluminium, etc.
POWER: electric 3 phase 400 V 50 Hz
NOTE: Can bevel any material with smooth surface finishing, groove free.
The feeding system with adjustable speed allows the unit to be used without the help of cranes or lifting devices.

dual amortization system

## Control panel

chips conveyance system

New on board control panel to operate the machine main functions.

The machine is equipped with a stepless variable head type which allows bevel angles from $15^{\circ}$ to $60^{\circ}$, granting a very easy and quick adjustment of the angle of bevel.

The machine is equipped with a plate detecting sensor and trolley with a new chips conveyance system. We have also implemented a dual amortization system which allows to overcome eventual imperfections of the wall thickness or eventual variations of the plate, as well as the imperfections of the ground.
