

# Compact Edge

Range w.t. 6-60 mm (1/4" – 2 3/8")

Brand new plate beveling machine **Compact EDGE**, featuring a high speed face mill with interchangeable inserts, with reduced structural dimensions and weight for a more flexible and dynamic use.

plate detecting sensor

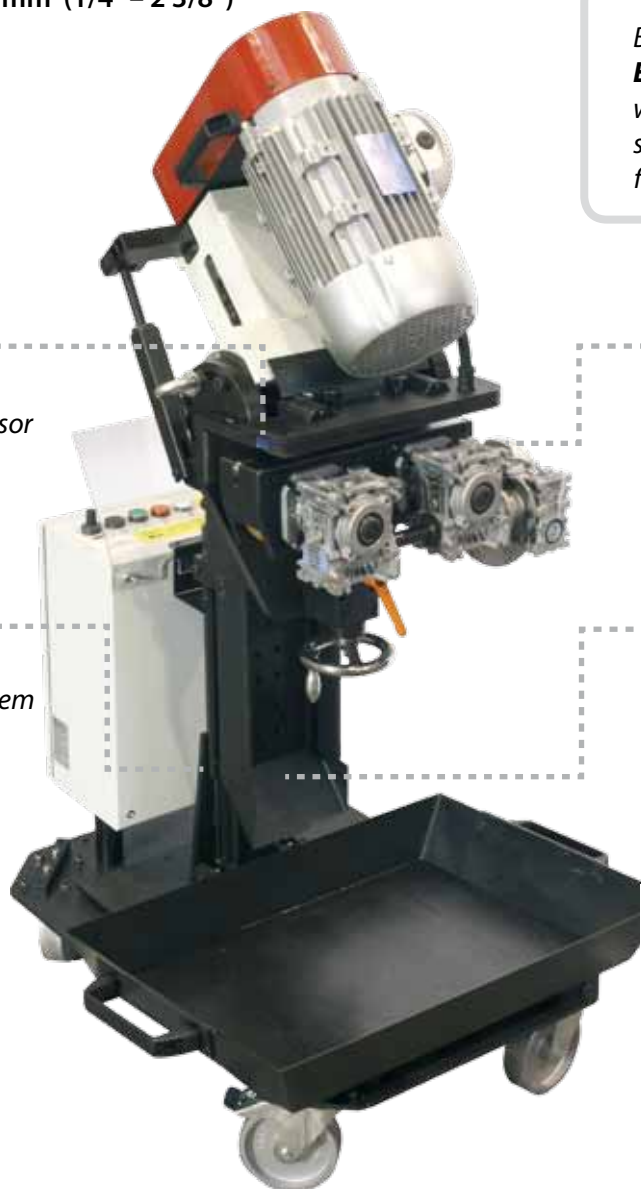

feeding system

dual amortization system

chips conveyance system

STANDARD

SPECIAL

Thanks to its new design the unit can be used in two different configurations:

- standard: the machine is used with the trolley
- special : the head of the machine is detached from the trolley and directly applied on the edge of the plate
