

Inflatable Pipe Stoppers

Sizes: 2 to 80" (50 to 2035 mm)

GBC Ltd offer a range of shapes and sizes of inflatable stoppers, suitable for all applications. Made from a natural rubber bladder covered in waterproof polyurethane coated nylon to prevent friction and static electricity build up.

Types of Pipe Stopper

Cylindrical

These are generally used for blocking pipes where access is restricted.

Spherical

These stoppers have less contact area than cylindrical stoppers, and are most suited to applications where access is further limited. Due to its shape the spherical inflatable stopper can be used at any angle.

Square / rectangular

These stoppers have a variety of applications, including in air conditioning ducting and venting.

Doughnut

These stoppers require minimal space and are perfectly suited to larger diameter pipes as there is less inflation required.

Sausage

The design of this type gives more contact area between the stopper and the pipe wall enabling these stoppers to hold back more pressure.

Heat resistant

These stoppers are made from a specially designed kevlar and nomex mix material to withstand temperatures up to 350°C for applications involving higher temperatures such as pre heating.

Each inflatable stopper comes with an inflation hose fitted with a schrader valve enabling inflation with a standard airline, bicycle or foot pump.

GBC Industrial Tools inflatable stoppers are supplied as standard with no through tube. Through tubes can be supplied when the stoppers are required for weld purging applications.

When deflated, the inflatable stoppers can be inserted and withdrawn with ease.

Part No.	Inflatable Stopper Size	Min ID MM	Max ID MM
IS2	2" (50mm)	45	55
IS3	3" (75mm)	70	80
IS4	4" (100mm)	95	105
